SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE.

three-page report concerning three unidentified structures between the towns of Csorna and Farad, near the Austro-Hungarian border, which were built in February and March 1957. The report states that the local population believes that the structures are intended to form part of a rocket-launching site. The report includes two sketches, one showing the location of the structures in relation to the nearby towns and the other showing details of the construction and the dimensions of the structures.

Unidentified concrete constructions  
near W. Frontier of Hungary

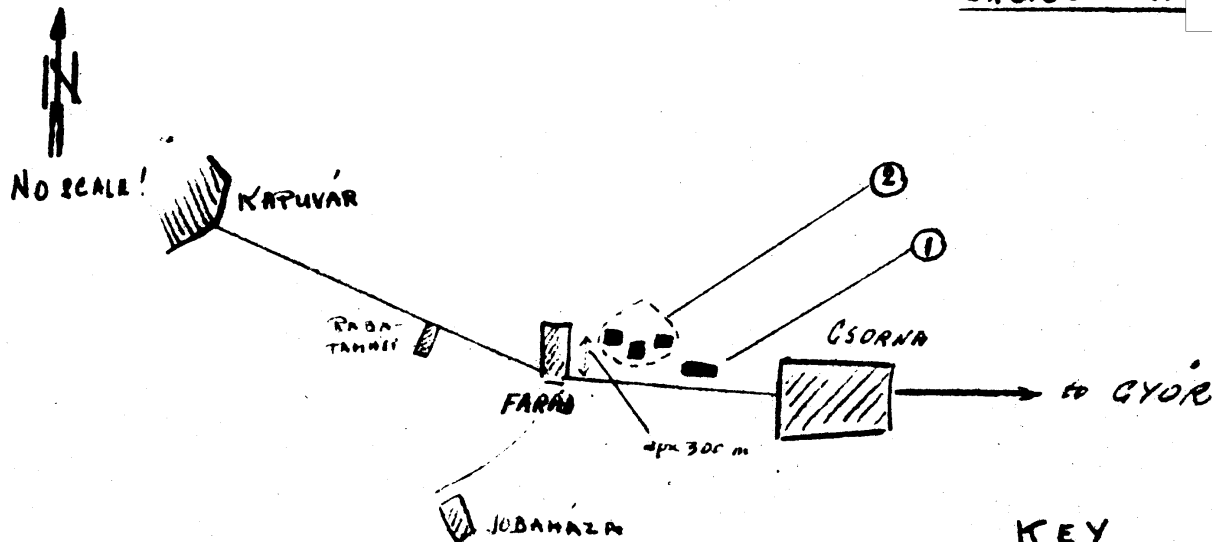

1. Between the towns of CSORNA and FARAD, near the Austro-Hungarian frontier, three concrete structures were built in February and March 1957 in the position shown on Sketch 1, attached, and in the form depicted on Sketch 2.
2. The concrete used was designed to take a pressure of 600 Kg/cm<sup>2</sup>. After completion, the structures were covered over with earth, and access to the area was again allowed for agricultural work.
3. The local population believe that these structures are intended to form part of a rocket-launching site, but there is no evidence as to why they are of this opinion.
